

When things get heated. BlueHeat® keeps you cool.

BlueHeat® is your best way to 'beat the heat'. This is a lightweight heat tested glove that can withstand temperature affected items up to 150°C.

The glove is made from comfortable, cool cotton and void filled, coated and dipped latex to produce a super wrinkle finish that minimises the contact surface area of the glove on high temperature items.

Tested to EN 407 class 2 to level 3 for contact heat.

*not suitable for welding or any open flame.

Part No.
